

Endress+Hauser at ILMAC Lausanne 2024

Innovative and versatile measuring devices for all needs

Endress+Hauser will be presenting innovative measurement solutions for life sciences and the food and beverage industry at this year's ILMAC in Lausanne from 18 to 19 September 2024. In hall 36, booth A172, Endress+Hauser will be showcasing innovations and proven technologies for reliable measurement, suitable for all applications.

New product line for level and pressure measurement

Specially tailored to the needs of the life sciences and food and beverage industries, the new Compact Line offers ideal solutions for hygienic applications, especially in small containers. The sensors have been developed with customer needs in mind and are characterized by a compact design, small process connections and excellent performance, making them versatile for both small and large operations.

With three measuring principles – pressure, continuous level and point level – it helps customers increase productivity, simplify workflows and offers optimal scalability. The 360-degree hygienic design and IP69 rating ensure efficient cleaning, while the welded stainless steel construction withstands on-site cleaning and sterilization. This reduces downtime and contamination risks. In addition, an intuitive touch display enables quick and easy on-site adjustments, while the seamless design prevents dirt build-up.

Precise and flexible mobile measurement solutions

Endress+Hauser presents a versatile mobile calibration solution, customized for industries such as food, chemicals and life sciences. The locally produced systems offer precise measurement technology for filling, dosing and calibrating in demanding environments. The mobile calibration and dosing trolley, equipped with automatic control and valve management, is ideal for large quantities, including viscous media. Hygienic and compliant with EHEDG and Ex standards, it supports both liquids and gases, with flexible options for inline or offline calibration. Traceable recalibration ensures long-term accuracy and standard compliance.

Memosens 2.0 – simple, safe and networked

Memosens technology stands for digitalization of measured values directly in the sensor head for contactless, digital signal transmission and for diagnosis and storage of all sensor-relevant data directly in the sensor. It has proven itself millions of times over since its introduction in 2004. Memosens 2.0 combines state-of-the-art technology with maximum practicability. Additional process data and diagnostic information allow precise predictions to be made about the current status and future maintenance requirements. The new Memosens generation is fully downward compatible.

Comprehensive services from a single source

Endress+Hauser guarantees customer proximity throughout Switzerland and is therefore represented by sales offices in Bussigny near Lausanne and in Balerna in Ticino, in addition to its headquarters in Reinach. The network of sales engineers and service technicians extends across the whole country and guarantees seamless support from project planning to commissioning. The team in Bussigny specializes in consulting, sales and customer service and offers tailor-made training courses and workshops in its

modern premises. This commitment enables Endress+Hauser to provide expert advice and a comprehensive service throughout the country.

Close to the customer: Endress+Hauser guarantees customer support throughout Switzerland – including at its own sales office in Bussigny near Lausanne.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement and automation technology for process and laboratory applications. The family company, headquartered in Reinach, Switzerland, achieved net sales of more than 3.7 billion euros in 2023 with a total workforce of almost 17,000.

Endress+Hauser devices, solutions and services are at home in many industries. Customers thus use them to gain valuable knowledge from their applications. This enables them to improve their products, work economically and at the same time protect people and the environment.

Endress+Hauser is a reliable partner worldwide. Its own sales companies in more than 50 countries as well as representatives in another 70 countries ensure competent support. Production facilities on four continents manufacture quickly and flexibly to the highest quality standards.

Endress+Hauser was founded in 1953 by Georg H Endress and Ludwig Hauser. Ever since, the company has been pushing ahead with the development and use of innovative technologies, now helping to shape the industry's digital transformation. 8,900 patents and applications protect the Group's intellectual property.
